The #1 Mistake Companies Make With Their IT

If you're like many businesses today, there's a good chance you've made this one mistake with your IT security: you don't budget for it.

Or if you do budget for it, it's not enough to really protect your business.

Time and time again, business owners decide NOT to invest in IT services. Instead, they go it alone or skip it completely.

Or they might approach an IT services company and ask, "What do you charge for your services?" They don't ask, "What will I get for my money?" or "How can you meet the needs of my company?"

This is a backward approach to IT - and it's a big mistake.

The fact is that a lot of business owners don't take IT seriously. They think that because they haven't been hit by a data

breach or a malware attack that it will never happen to them. That's another big mistake. Just because a business hasn't fallen victim to a cyber-attack DOES NOT mean they're safe.

It's the opposite.

When you hire an IT services company, what do you get for your money?

The honest answer is that it depends on your specific needs. Many IT services companies offer everything from basic to advanced network security. You can expect services like:

- Cloud backup
- Data protection
- Data monitoring
- Threat detection
- Technology maintenance
- And more!

Everything is designed to protect you, your network, your technology, your employees and your business as a

whole. It's all about giving you the information and resources you need so you can worry less about outside threats and focus on your customers and the success of your business.

When you're invested in good IT security, you shouldn't even know it's there. It runs in the background like a quiet but powerful electric motor. It's there when you need it, and it's there when you're not even thinking about it.

For some business owners, this is a tough pill to swallow. They don't have something tangible in front of them that they can see 24/7. A lot of business owners like to be more hands-on. They like to see what their money is buying.

The great thing is that a good IT services company will provide you with something tangible. If you want to see what is going on behind the scenes of your IT security, they will give you a complete report. Every day (or week or month), you can have an e-mail delivered to your in-box that breaks down exactly what your IT services firm is doing for you.

"We can't wait to react until something happens. Because when something does happen, it's often too late."

You can see things like the threats they blocked from getting through. You can see when they performed system maintenance or when your data was backed up. You can customize these reports to your needs. Basically, you can see what you're paying for and how it's working. This is the very definition of "peace of mind."

Today, none of us can afford to skip out on good IT security. We can't wait to react until something happens. Because when something does happen, it's often too late. The cybercriminals have done their damage and moved on. Meanwhile, your business comes to a screeching halt, and you have to pay the big bucks to get everything back on track – if you can get back on track.

Some businesses don't get back on track. They are forced to close after a cyber-attack because they don't have the money or resources to recover. The damage is simply too much and the cost too high. If they had invested in IT security upfront, it might be a different story.

Don't get caught off guard by a data breach, malware infection, hacker attack or data loss due to technology failure or natural causes like flood or fire. It's time to take your IT to the next level. Protect your business the right way and avoid the mistake so many others make when they avoid the investment in good IT.

Work with an IT services firm that takes your business as seriously as you do.

Shiny New Gadget Of The Month:

The Manta5 Hydrofoiler XE-1

If you could ride your bike on the water, would you? Thanks to the Manta5 Hydrofoiler XE-1, you can. The Manta5 Hydrofoiler XE-1 is a high-performance watercraft for people of all ages. The minds behind Manta5 wanted to bring cycling to the water – and they succeeded.

The hydrofoil design helps keep you balanced while you pedal across the water, similar to how you pedal on a bike. You can use it on the ocean, in rivers and in lakes. Learning to ride takes practice, but once you get the hang of it, it's a breeze! It won't be long until you're jetting across the water – on your own power! There's even a small electric motor that brings you up to speed if you need it. Take your summer to the next level and learn more at Manta5.com.

The Rest Is My Job

How would you like to be in the position to create the largest army that the world has ever seen (*over 13 million soldiers*) and do it mainly with people who have NEVER commanded troops in their life?

That was exactly the position General George C. Marshall found himself in during World War II. Not only did he have to assemble this incredible army, but he also had to do it in the shortest amount of time possible. He appointed over 600 people to positions of general officer or division commander, with few "slackers."

So, what was his secret to being so successful in putting the right people in the right positions? Smart leaders hire people based on their strengths – what the person *can* do, not what they *can't* do.

For example, General Marshall's aides were worried about him putting a certain colonel, who was known for **not** getting along with his superiors and being terribly rude, in charge of training. They told Marshall, "If things go wrong and he has to testify in front of Congress, he will be a disaster for you and your reputation."

General Marshall asked his aides, "What is his assignment ... what do we need him for?"

They responded, "To train troops – an entire division."

Marshall then asked, "Is he a first-rate trainer?"

His aides responded, "Yes sir, General. He is the best we have."

He said, "Well, give him the assignment. The rest is my job."

THE REST IS MY JOB. What a great statement. Sometimes a good leader will have to protect, and even defend, some of their subordinates who may

have some rough edges when it comes to diplomatically communicating with other bosses or departments. These leaders know they have a high achiever, a real winner, when it comes to getting the job done, and they will do everything they can to protect their asset.

Who would you rather have in a position: **1)** the most polite communicator who ruffles no feathers; challenges no person, policy or procedure and has an average performance rating, or **2)** a highly focused, determined, loyal, "tells it like it is – good or bad" leader who occasionally upsets those who hindered their progress and is known for always getting the job done? Give me #2 any day – **the rest is my job to keep the peace.**

Leadership is not about authority. If you are taking the position because it gives you power, supremacy or authority over people, please do not apply. It is a servant position. You are there to help others succeed. **It isn't about you; it's about them.** Hire others for their strengths and let them at it. Learn about the man who created the largest army in the history of the world and who understood we are graded on results ... The rest was his job.

Robert Stevenson is one of the most widely recognized professional speakers in the world. Author of the books *How To Soar Like An Eagle In A World Full Of Turkeys* and *52 Essential Habits For Success*, he's shared the podium with esteemed figures from across the country, including former President George H.W. Bush, former Secretary of State Colin Powell, Tony Robbins, Tom Peters and Stephen Covey. Today, he travels the world, sharing powerful ideas for achieving excellence, both personally and professionally.

Need NIST 800-171/DFARS Compliance?

For businesses in the DoD Supply Chain who need to comply with DFARS/ NIST 800-171 Security Protocols, InTech provides Risk Assessments, Security Audits, Compliance Audits, Plans of Action, and Remediation to bring YOU into compliance and assure you keep your contracts. Start the process today with a free, no obligation survey to get an idea of what you need to do to come into compliance. Go to www.intechit.net/NISTassessment and take just 5 minutes to jump start compliance.

“The World Needs You ”

As the Chair of the Board of Trustees of Westmoreland Community College, I give a speech at commencement. This year, not surprisingly, commencement is quite different than other years.

Our messages will be “virtual” and conferring of degrees will look more like a “drive thru.”

Because of the inability to really connect with people, and understanding the deep-seated fears of so many as they embark on a new journey, I felt the message I delivered must be both short and meaningful.

Below is an excerpt. I hope this causes you to remember that “the world needs you,” too.

“...The fact of the matter is that we have seen greater misfortune in our history, and have experienced both times of great calm and times of great upheaval. So even though what we are experiencing seems terribly abnormal, in the course of human history, it's part of the pattern.

Seneca also said, “I judge you unfortunate because you have never lived through misfortune. You have passed through life without an opponent – no one can ever know what you are capable of, not even you.”

Never doubt for a moment that you are being formed for greatness. It is only by adversity that we grow. You've experienced that firsthand as you've pushed yourself to learn and change during your time here at Westmoreland, despite the craziness and uncertainties.

You've proven that you are ready for the next step, and the world needs you, your skills, your calm mind, and your tenacity now. Welcome to the next leg of your journey! Godspeed!”

To Your Success,

Leia Shilobod, heading in for the virtual commencement taping at Westmoreland County Community College
