Why Your Business Is The PERFECT Target For Hackers...

Everybody gets hacked, but not everything makes the evening news. We hear about big companies like Target, Home Depot, Capital One, and Facebook getting hacked. What we rarely hear about are the little guys – the small businesses that make up 99.7% of employers in the United States, according to the Small Business Administration. It's these guys who are the biggest targets of cybercriminals.

Basically, if you run a business, that business is a potential target. It doesn't matter what industry you're in, what you sell or how popular you are. Cybercriminals go after everybody. In 2018, a cyber security survey by the Ponemon Institute found that 67% of small and midsize businesses in the U.S. and U.K. were hit by a cyber-attack.

For the cybercriminal, casting a wide net makes the most sense because it gets results. It puts them in a position where they are able to extort money, steal sensitive information and ultimately profit off of destroying the property,

prosperity and reputation of others. Why do cybercriminals love to target small businesses? There are a handful of reasons why small businesses make sense to attack.

1. Small Businesses Are The Most Vulnerable. Business owners, entrepreneurs and executives aren't always up-to-date on network security, current cyberthreats or best practices in IT. They have a business to run and that's usually where their focus is. Unfortunately, that means cyber security can take a back seat to other things, like marketing or customer support. This also means they might not be investing in good network security or any IT security at all. It's just not top-of-mind or they may feel that because it's never happened to them, it never will (which is a dangerous way of thinking).

2. Small Businesses Don't Take IT Security Seriously. Coming off that last point, it's true that many businesses don't properly secure their network because they feel that they aren't vulnerable. They

Continued on pg.2

Continued from pg.1

have the mindset of “It hasn’t happened to me, so it won’t.” Along those same lines, they might not even take password security seriously. According to research conducted by Trace Security, upward of 80% of ALL breaches come down to one vulnerability: weak passwords! Even in 2020, people are still using passwords like “12345” and “password” to protect sensitive data, such as banking information and customer records. Secure passwords that are changed regularly can protect your business!

3. Small Businesses Don’t Have The Resources They Need.

Generally speaking, medium to large companies have more resources to put into IT security. While this isn’t always true (even big companies skimp on cyber security, as the headlines remind us), hackers spend less time focused on big targets because they assume it will take more of their own resources (time and effort) to get what they want (money and sensitive data). Many small businesses lack the resources like capital and personnel to put toward IT security, so hackers are more confident in attacking these businesses.

Just because you haven’t had any major problems for years – or at all – is a bad excuse for not maintaining your computer systems. Threats are growing in number by the day. While many small businesses might think, “I don’t have the time or resources for good security,” that’s not true! You don’t need to hire IT staff to take care of your security needs.

You don’t need to spend an arm and a leg securing your network. IT security has come a LONG way in just the last five years alone. You can now rely on IT security firms to handle all the heavy lifting. They can monitor your network 24/7. They can provide you with IT support 24/7.

That’s the great thing about technology today – while many hackers are doing everything they can to use technology against us, you can use it against them too. Work with a dedicated and experienced IT security firm. Tell them your business’s network security needs, and they’ll go to work fighting the good fight against the bad guys.

Shiny New Gadget Of The Month:

Weber Connect Smart Grilling Hub

Grilling can feel like guesswork. You throw the food on the grill and keep a close eye on it, hoping for the best. Say goodbye to guesswork and overcooked steaks with the Weber Connect Smart Grilling Hub.

The Weber Connect takes the thermometer and timer into the WiFi era. It monitors your food and sends updates to your smartphone. It lets you know when to flip the burgers or steaks – and then notifies you again when it's time to take them off the grill. You can even have the Weber Connect tell you when your meat of choice has reached your ideal level of doneness. It's great for those who are new to grilling or don't grill often, and it works with every grill! See more at [bit.ly/3eTL69Y!](http://bit.ly/3eTL69Y)

Make An Impact

Why did you decide to start your own company? When I ask business owners and entrepreneurs this question, they most often answer, "I wanted to make a positive impact in the world."

The same is true for me. Yes, sure, I wanted to be my own boss, do work that brings me joy, create my own systems, have financial freedom ... but the endgame was that I wanted to make things better through my business. I wanted (and still want) to eradicate entrepreneurial poverty. To make the world a better place for me, my family and my community.

I know – with the current state of things, you may be feeling as though your dreams are too lofty and need to take a back seat. Your business has a crisis to survive, after all. But you can accomplish both surviving (heck, thriving) and making an impact – even during a pandemic.

You are closer to your dreams than you may feel right now. They don't have to fall by the wayside.

The biggest impact you can make right now is through HOW you serve your clients and community in the face of one of the biggest challenges in our lifetime.

But you can't do that if you don't have a solid foundation in your business.

So let's recap what I have been posting about: The Business Hierarchy Of Needs (mikemichalowicz.com/the-business-hierarchy-of-needs) is the key to your business's success

right now.

The needs of your customers and clients have likely changed over the last few months and you may feel stuck in, say, the sales level of the Hierarchy. This is why I created the Recession Response (mikemichalowicz.com/recession-response), which addresses the HOW – how to take steps to ensure your first three levels of The Business Hierarchy Of Needs are in place, so you can go ahead and make your impact in the world.

I invite you to visit the Recession Response for tips and tangible, actionable resources to help you maintain your SALES, PROFIT and ORDER levels of The Business Hierarchy Of Needs, because you can still achieve your dream and impact your community in a positive way.

You were put on this earth to have an impact. And that impact is not achieved by sacrificing yourself or your business. Nail the first three levels of sales, profit and order. Then you can give back to the world and make your impact.

MIKE MICHALOWICZ (pronounced mi-KAL-o-wits) started his first business at the age of 24, moving his young family to the only safe place he could afford – a retirement building. With no experience, no contacts and no savings, he systematically bootstrapped a multimillion-dollar business. Then he did it again. And again. Now he is doing it for other entrepreneurs. Mike is the CEO of Proventus Group. He is also a former small-business columnist for The Wall Street Journal; MSNBC's business makeover expert; a keynote speaker on entrepreneurship; and the author of the cult classic book The Toilet Paper Entrepreneur. His newest book, The Pumpkin Plan, has already been called "the next E-Myth!" For more information, visit MikeMichalowicz.com.

Need NIST 800-171/DFARS Compliance?

For businesses in the DoD Supply Chain who need to comply with DFARS/ NIST 800-171 Security Protocols, InTech provides Risk Assessments, Security Audits, Compliance Audits, Plans of Action, and Remediation to bring YOU into compliance and assure you keep your contracts. Start the process today with a free, no obligation survey to get an idea of what you need to do to come into compliance. Go to www.intechit.net/NISTassessment and take just 5 minutes to jump start compliance.

“Never Let The Future Disturb You ”

“Never let the future disturb you. You will meet it, if you have to, with the same weapons of reason which arm you against the present.” – Marcus Aurelius

As leaders we have stood grounded and solid during this crisis to lead our teams through uncertainty, and grow, but sometimes just SAVE our businesses.

We have experienced almost constant change since March. And you know what? Constant change is REALLY HARD! As humans, having no consistency and new mandates passed down almost weekly is really tiring. It wears on your mind and your soul.

When I'm feeling the real burden of this constant change – and wonder what will happen next – if I will be ready, if I can still handle it, I remember this quote by Marcus.

When you feel anxiety or stress, what you're experiencing is worry about the future. We don't know what the future holds; we simply cannot. And worrying about the future isn't going to stop it from coming with whatever it holds.

Breathe deep my friends. Remember that you've gotten this far and you're still kicking butt. You WILL meet the future with your weapons of reason, and you will conquer it.

To Your Success,

Marcus Aurelius
