## How Co-Managed IT Could Save Your Company From Financial Disaster

When you consider the investments in your business that you can make as a CEO, you probably think to yourself, “Which investments will give my company the best ROI?” With that in mind, would you think of making a significant investment in bolstering your IT department?

Many CEOs are understandably hesitant to throw a lot of money into their IT department because the ROI is more difficult to estimate. That said, though, consistently updating your company’s IT services is becoming increasingly crucial to the continued success, and indeed safety, of your company. Ransomware and other cyber-attacks that steal company data are becoming more frequent and more costly, while IT departments continually get the short end of the budgetary stick.

While that all undoubtedly sounds horrible, you might be wondering just what you can do about it. After all, you only have so much money you can invest back into your company’s IT department,

and it might not be sufficient for keeping your IT staff from getting burned out, disgruntled or making costly mistakes – even when they’re performing their responsibilities to the best of their abilities.

What if there were a way that you could have access to the most up-to-date IT knowledge and software while also not having to shell out the funds necessary to update your systems and hire more knowledgeable employees? Well, that’s where co-managed IT can be your company’s life preserver.

Co-managed IT is a flexible system for keeping data for your company, employees and clients safe from cyber-attacks as well as assisting in your daily operations where needed. Think of it as “filling in the gaps” that your current IT department (try as they might) struggle to fill.

For instance, say your current IT department is great at taking care of the day-to-day fires that inevitably come up

*Continued on pg.2*

Continued from pg.1

in a normal workday, but they struggle to get to the “important but not urgent” task of updating your company’s cyber security and creating data backups. Maybe it’s the other way around, where your IT department is very focused on security, but they struggle to find time to assist employees with password resets and buggy programs. Maybe neither of these cases describes your IT department, but they still need better access to the tools and software that would allow them to reach their full potential in protecting the company’s sensitive information. Or maybe your company is going through a period of rapid expansion, and you just don’t have time to build the kind of IT infrastructure that would best serve your needs.

Regardless of what your IT department’s current needs are, co-managed IT is the solution. We’re here to do the tasks and provide the tools that your current IT department just can’t provide. Make no mistake, however: our intent is not to replace your current IT leader or team. In fact, we rely on the expertise that your IT department has about your systems. That’s what makes up the “co” in “co-managed IT.”

In order for co-managed IT to work, your company’s IT department will need to see us as an ally in doing their job, not as an adversary. At the same time, they’ll also need to be open to new ways of doing things. The world of cyber security is constantly changing, and if your IT department is set in their ways and unwilling to budge, your company will be left with an antiquated system, chock-full of valuable data that hackers and cybercriminals can easily exploit. Finally, however, in order for co-managed IT to work, your company still must be willing to invest in its IT department. We know that the ROI might not be as clear as it is for some other investments, but trust us, the consequences of not having up-to-date IT services if (or when) hackers steal your sensitive data could financially devastate your company – or even end it altogether.

So, with that in mind, we hope you’ll consider the benefits of co-managed IT and how it can make your company safe from cyber-attacks and bring you peace of mind.

## Shiny New Gadget Of The Month:

### 'Peep' The World Around You

Peeps by CarbonKlean is the ultimate cleaning tool for glasses – far better than your traditional rag, spray or T-shirt. It's compact, easy to use and, most importantly, revolutionary in its ability to not only clean smudges off your glasses but also protect them from the next smudge.

Peeps uses state-of-the-art carbon molecular technology to remove smudges and dirt at a microscopic level as well as keep your lenses clear of contaminants long after you use it.

To clean your lenses with Peeps, simply brush them to remove dust and particles, wipe them between the heads of the tongs and enjoy your crystal-clear vision!

## How To Succeed In Business And Life In Just 8 Hours Per Week

Do you want to know my secret to success – how I'm able to live the way I do after growing up in a dysfunctional family, lasting half a semester in college and possessing no special skills, talents or intelligence? Well, I do two things that most people don't do: I study and I plan.

I pull these two levers once every day (and twice on Sunday), and that's what has led to three decades of success. You can follow my example. Like all fundamentals of success, the daily disciplines of studying and planning are easy to understand, but hard to maintain in practice. Most people don't have discipline, and, therefore, they do not succeed. What's more is that in total, you only have to study and plan for eight hours every week! Curious about how that works? Let me break it down for you.

Early each morning, I give myself an hour to study and plan as needed. No matter how early the rest of my day starts, I always start with this hour – no exceptions. I devote the first 30 minutes to studying. When I say "studying," what that basically means is that I'm reading a book to grow one of my core skills. Don't spend that first 30 minutes reading useless crap; only focus on books that will help you grow in some way.

If your response to that idea of studying was that you don't have time to read, then I would say you're lying. Bill Gates, Warren Buffett, Oprah Winfrey, Elon Musk and Jack Ma are all voracious readers. Do you think you're busier than them? Yeah, thought not. They're not the only ones either – the average multimillionaire reads at least two books a month. And guess what? I can get through that many books in a month by reading just 30 minutes a day.

*Darren Hardy is the former publisher of SUCCESS Magazine, and he has written several best-sellers, including The Entrepreneur Roller Coaster, Living Your Best Year Ever and The Compound Effect. He is also the recipient of the "Master of Influence" designation from the National Speakers Association (NSA), which honors his professionalism and public speaking ability.*

I spend the remaining half of the first hour of my day planning. That means I review my MVPs (most valuable priorities) and walk through my day in my head. Thinking about how I might interact and empathize with people helps me grow my emotional intelligence.

It's also during my planning time that I identify my spotlight moments – the moments when I know my example is on display, where I need to maximize my excellence. Want to know a little secret? Being excellent isn't about trying to be incredible at everything all the time – it's about picking the right moments to maximize your effort and be disproportionately excellent.

So, altogether, if you do those two things for an hour each day, that's seven hours. The eighth hour happens on Sunday afternoon, when I plan out my week. And that's it. That's how you get a massive edge over your peers in whatever you're doing. Too few do it and stick with it, and that will make it all the easier for anyone who does stick with it to succeed.

### Need NIST 800-171 | CMMC Compliance?

For businesses in the DoD Supply Chain who need to comply with NIST 800-171 Security Protocols and CMMC, InTech provides Risk Assessments, Security Audits, Compliance Audits, Plans of Action, and Remediation to bring YOU into compliance and assure you keep your contracts. Start the process today with a free, no obligation survey to get an idea of what you need to do to come into compliance. Go to [www.intechit.net/NISTassessment](http://www.intechit.net/NISTassessment) and take just 5 minutes to jump start compliance.

## Who Else Wants To Win A \$25 Gift Card?

You can be the Grand Prize Winner of this month's Trivia Challenge Quiz! Just be the first person to correctly answer this month's trivia question and receive a \$25 Visa gift card Ready?

What popular social networking site was sold to News Corp. for \$580 million in 2005?

- a) Twitter
- b) Myspace
- c) Facebook
- d) Snapchat

## “It Is Only Up to Us”

What words can you use to describe meeting and hanging out with a legend? Humbling? Amazement? Awe? I think it's impossible for anyone in the United States (perhaps the world) to not know who George Foreman is despite your age or background. From his boxing days to selling his George Foreman grill on TV, he has become a household name and familiar face to us all.

He really is a genuine, real, and caring man. Listening to him retelling the stories of his life truly feels like listening to an old friend recount lessons learned, and you feel that he's passing those lessons down in earnest to help YOU as an individual.

George's journey seems to be an interesting mix of refusing to give up and having people in his life at the right time opening doors of opportunity for him to walk through. And the thing about that is that we all have those doors of opportunity that are opened for us. The key to success is whether we walk through it. It is all up to us, only up to us, and all about the choices we make.

I recognize the times that a door of opportunity was opened for me, and I didn't walk through. I also recognize the times when I was ill prepared to walk through that door and I screwed up pretty bad. I own my mistakes and I know that I need to work hard to always be prepared – then show up and deliver.

Too often we live with a victimhood mentality, we blame others for where we are, how we feel, as well as our success and failures. In the end, if we succeed it is our fault, and if we fail it is our fault: it is only up to us.

It was a pleasure to have met you, George. Keep fighting.

To Your Success,

**Fighting the good fight  
Leia and George**
